

AutoCAD: Essentials Course Outline

Overview

This 3-day AutoCAD®: Essentials class is designed for those using AutoCAD® or AutoCAD LT® with a Windows operating system. The objective of AutoCAD: Essentials is to enable students to create basic 2D drawings in the AutoCAD software.

This course will cover the essential core topics for working with the AutoCAD software. The course will teach you some basic tools that enable the student to create and edit simple 2D drawings, and then continue to develop with those tools to create more complex drawings. The topics you will learn during this course will help you gain the necessary knowledge and skills to become a more effective CAD user such as:

- Understanding the AutoCAD workspace and user interface.
- Using basic drawing, editing, and viewing tools.
- Organizing drawing objects on layers.
- Inserting reusable symbols (blocks).
- Preparing a layout to be plotted.
- Adding text, hatching, and dimensions.

Prerequisites:

Students will need a working knowledge of basic design or drafting procedures and terminology and a working knowledge of the Windows operating system.

Completion of the Course:

At the completion of this course the student will have a good working knowledge of the AutoCAD system and will be well on their way to begin creating standard 2D drawings.
